UnaliWear®

Extending independence with dignity

I feel as though I have another person here at home to help me should I need, as well as when running errands. The sense of security with this watch is wonderful. I have had other products before, but none gave me the security as this watch.

Rated Best for:

- **Fall Detection**
- **GPS Tracking**
- **Emergency Response**
- **Customer Service**

Meet the Kanega Watch®

Traditional medical alert devices are worn grudgingly, if at all. People want to feel protected, particularly from unexpected falls, but clunky and stigmatizing pendants or wristbands are a huge turn off.

Unmatched Peace of Mind for You and Your Loved Ones

- The only medical alert watch with fall detection that you can truly wear 24/7. Thanks to the quick swap rechargeable battery system, you never need to remove your Kanega Watch to charge.
- Exclusive RealFall™ Fall Detection Technology—Top rated for activating on actual falls and gets even smarter over time.
- Unbeatable coverage inside your home and throughout the country—Connects through WiFi and cellular
- 3 ways to get help—Press crown button or simply ask for help to reach US-based emergency response operators 24/7/365 (fall detection activation will automatically connect).

Did You Know?

Traditional medical alert devices are worn, on average, less than 40% of the time vs. close to 90% for the Kanega Watch.

"I think it is great to wear all the time and gives me security day and night."

The Kanega Watch vs. Other Mobile Medical Alert Alternatives

	Kanega Watch	Other Medical Alert Watches	Apple Watch
Can be worn 24/7—from bed to shower to shopping—no need to remove to charge	✓	✗	✗
Fall detection built into watch	✓	Rarely	✓
Features RealFall™ technology	✓	✗	✗
WiFi AND cellular connectivity - for best call coverage/GPS	✓	✗	✗
3 ways to get help: button, voice OR fall detection	✓	✗	✓
Connects to US-based monitoring center with all wearer's info	✓	✓	✗
Medication reminders	✓	Rarely	✓
Works out of box - no set up required	✓	Not Always	✗

Did You Know?

Other mobile medical alert devices use only a cellular connection for emergency response. The Kanega Watch uses both WiFi (in the home) and Verizon Cellular (outside the home) If you have limited or spotty cell service in your home, a clear WiFi connection can be critical.

"Kanega uses both wifi and cell, so I have dependable coverage nearly anywhere."

The Kanega Watch in an Emergency

Press or Speak

Immediately connects to a US-based response operator 24/7/365 who knows your name, address, location, emergency contacts and other key info you have provided to UnaliWear.

Auto Fall Detection

Alerts the operator (even if you can't press or speak) who will promptly reach out to your emergency contacts and can dispatch emergency services to your GPS location.

The Help You Need

Your response operator is trained to quickly determine and engage the appropriate support needed – ambulance, fire, police, or simply contacting a family member or neighbor. Your standby assistance is **always there.**

UnaliWear's RealFall™ Fall Detection

- Comes standard in every watch at no additional cost/fee.
- Developed based on actual fall data by Kanega Watch wearers and gets increasingly smarter, continuously improving fall detection accuracy.
- Learns each wearer's natural movements over time, further reducing/eliminating false fall alerts.

"My father wandered into the garage at 2:30 am. one night. The lights went out and he fell. Thank goodness he was wearing his Kanega Watch. We immediately received a call that he had fallen".
